PROJECTS:

Steakhouse Society - Ecommerce Application (April 2022 - Aug 2023)

- PERN(Postgres, Express, React, Node) tech stack
- Created a clean and sleek user-friendly interface using React, enabling customers to browse and shop for high-grade delicacies like Steaks, Caviar, and Seafood
- Leveraged Express and Node.js to build a robust and scalable backend, facilitating seamless communication between the client and server
- Utilized Postgres as the database management system to efficiently store and manage product inventory, customer details, and order information
- Implement Stripe to handle order transaction

La Reserve - Fitness Application (Sept 2022 - March 2023)

- PERN(PostgreSQL, Express, React, Node) tech stack
- Created an intuitive user interface using React and its extension, Next.js, to provide an enhanced user experience with server-side rendering and improved performance
- Online simulated application that allows users to browse through various luxury hotels and book trips with these hotels around the world.
- Integrated third-party APIs for geolocation and booking confirmation and email notifications.
